

1:6 Scale "WOODEN" STOOL Template

<https://www.youtube.com/@e.d.t.>

This chair design was intended to be made with chipboard/matboard that is approximately 1/16" thick or with 0.5cm wide coffee stirrer craft sticks.

When using coffee stirrers: Line up coffee stirrers over the sides and bars and cut them to the black lines.
(The expanded gray lines are there to help guide your cuts.)

When using chipboard: Cut out black outlines and trace them onto chipboard.
Use the numbers to determine the amount of chipboard layers needed for each piece.
(example "x 4" means 4 total chipboard cut-outs) If you use different materials,
more or less layering may be needed.
